BUSSOLA ISOLANTE BU03--
VEDI pag: 37.3

MONTANO I MORSETTI A SCATTO E AD INNESTO
VEDI pag: 37.2 e pag: 37.4

I rocchetti della serie "LF" sono praticamente una variante dei modelli "FG".
Con la sostituzione delle due flange superiori con forrette, da altrettante
flange aventi le uscite ad asola si e' ottenuto un minore ingombro in altezza
consentendo l'utilizzo agevole delle basette e relativi morsetti.
Rimane la possibilita' di utilizzare i guanciali "G" e testate "TF" degli attuali
rocchetti della serie "FG".
